

User Documentation

Prototype 1:

To access website, type in the displayed sentence.

A continue button will appear. Click on it to proceed to website.

If user wants to add website restriction, click on extension logo > blacklist.

Prototype 2:

To access website, click on an answer.

If answer is correct, three buttons will appear. Choose one by clicking on it.

If answer is incorrect, user will have to try again with another question.

To change the difficulty level, repeat interval, language, number of questions, click on change settings.

The repeat interval is the interval at which the page will pop back up.

Prototype 3:

To access the website, feed pet by:

1. Selecting time use is willing to wait before accessing website.
2. Clicking on feed button.

To access pet information, click on the extension logo.

Pet will level-up as user feeds it or will die if user doesn't.
